## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1-7 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 8-19, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 8-19 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on 2/6/03 is hereby withdrawn.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The prior art neither discloses nor teaches a hybrid bearing having a bushing comprising a plurality of dynamic pressure generating openings penetrating completely through the bushing for storing lubricant. All of the prior art shows pressure generating grooves which only penetrate through a portion of a bushing, sleeve or shaft. The Wasson reference used in the previous rejection discloses tiny openings, 8, for allowing lubricant to flow through to the pressure generating grooves. However, these openings are not pressure generating openings, and therefore, do not read on the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
